Persons of Consumptive Habits, Read This! TO THE GREEKNEURG COMPANY : For the first time

in my life am induced to cert fy to the truly wonderu effects of a popular medicine, but in sending you the owe to the Gradenberg Company, and more especially to aufferfog humanity.

At out the first of June last I had a negro man taken with a Cough, attended with restlessness, spitting of blood and other dangerous symptoms of consemption. I imme dialety called in a truly skilful and selentific physician, who told me it was a case of consumption. He treated him for several weeks, but he gradually grew worse, I then had another physician of great reputation in lung di cases. He H THUNKS, for the Fall and Winter Trade, consisting examined him, and also decided it to be a hope es care of n part ac follows, viz: For Ladies, Misses and Children.

I had previously promised the Grae'enberg Agents here, (Messra Wells & Lowell,) that when the doctors gave him up I would try the Gim's oberg Con sumptive's Baim. I did so and to my agreeable surprise, the man began to isoprove after taking only five or six doses. He took only two bottles of the Baim and three bottles of the Guefenberg Sarsapar 1 is Compound, which cost me the small sum of nine dollars,

and to day I consider him entirely cored. He is worth \$1.200, and he is doing me good service on the plantation. consider him perfectly ound and we las he is fat, hearty and strong, without a vertige or sign of disease left. JOHN MYKLS, I have used the Grafenberg Consumptive's Balm in se vere cases of Consumption, in my practice, with the happlest effect. I wish all would use it.

S. MEDARIS, M. D.,

THE GREATEST INVENTION OF THE AGE. West's Patent Galvanic Cement For Roofing.

THE subscriber is now prepared to cover roofs of buildings, with a new and better article than ever before known. The public are aware that our Government has had scientific men experimenting, and that it has been the study of Architects and Builders, for years, to discover an article for roofing purposes, that would stand the sudden changes of the weather, and be impervious to fire and water, and remain a permanent fixture. As yet, nothing has been attained without costing more than the people wish. The contraction, expansion and rusting of metal roofs, are so great in changeable climates, that they become uscless, unless being repaired at great expense yearly. Shingles are not fire proof, and cannot be used on flat roofs, and the various Compositions and Cements that have been brought into use for roofing, do not stand the action of the weather, but they run when it is warm, and crack when frosty, and after one or two years become crumbly, and worthless; whereas, the inventor of the Galvanic Cement, has labored twenty years to combine articles to obviate those difficulties, and can testify from his long experience, and numerous testimonials from reliable persons, who have had his combination applied to their buildings, that his Cement is the cheapest and best aticler ever before known. The combination of this Cement is such that it is calculated for entire new roofs, flat or steep, covering over old shingles without removing them; lining eave-troughs, seaming around battlements, chimneys and sky-lights. Covering car-tope, steamer-decks, &c. This Cement, by its non-conduction and galvanism, prevents metal roofs from rusting and unsoldering, and resists the extremes of heat and cold, better than any thing ever invented, for entire roofs or for covering metal and the out side of wood buildings, making them fire proof. Its appearance is like slate; beautiful for the right to the State of

pearance is like slate; beautiful for the rich palace or the humble cottage.

The undersigned having secured the right to the State of Tennessee, will sell rights of Territory, by Counties or Towns, on reasonable terms.

The subscriber is also prepared to cover roofs of buildings, in any part of the State, at thort notice.

This Roof is now being put on in this city, for the benefit of all concerned, and warranted to excel all other modes of Roofing. The subscriber has lad his mode of Roofing tested as to its qualities, during the last year and a half in the city of Memphis, which has proved satisfactory, to which a number of the nost prominent citizens can testify.

Attached is a note from John L. Morgan, Esq., Architect, by which may be seen the opinion of Mr. Samuel Sloan, the celebrated Architect, and writer upon Architecture, whose experience with this mode of roofing, without a doubt, is satisfactry to all. MEMPHIS, March 12, 1857.

Ma. W. S. Besserr.—When in Philadelphia, Pa., a few days ago, I called upon Mr. Samuel Sloan, the celebrated Architect, and author of the Sloan Work on Architecture. I asked his opinion as to the durability. &c., of West's Patent Roof, such as you are using in the city of Memphis, and he told me that he had no hesitation in saying to me that it is a good and durable roof, and is all that its advo cates claim it to be; farther saying that he is using it on a fine building for himself. Respectfully.

Bennett covered two roofs for me last spring, with a com-position called West's Patent Galvanic Cement one of them was a new deck, the other an old shingle roof, which are giving perfect satisfaction. He also repaired a dor-mer window, which leaked hadly, and had bailled the skill of Carpenters to prevent its leaking, which he succeeded in making perfectly tight. I do most cheerfully recom-mend his more of roofing to the public, for all roofing

purposes, and believe it to be a permanent fixture against fire and water.

MR. BENNETT, - Dear Sir: - Our company having been troubled very much with leaky cars, put some of your Patent Paint upon them, and so far as my knowledge ex-tends, I can cheerfully recommend it to any who wish a dry roof of any sort. H. COFFIN, Superintendent.

MEMPHIS, TENN., Jan. 14, 1857.

To the Public.—W. S. Bennett, made application to us last summer to cover our buildings with West's Galvanic Cer.ent; it being a new thing, we thought we would try it; hat it applied to our Blacksmith Shop, and Engine House, attached to the Fo indry. They have proved all required of a water proof roof, having withstood some of the greatest storms, and are giving good satisfaction. We can only add, try it and you will be satisfied.

Mampais, Jan. 14, 1857 MEMPHE, Jan. 14, 1857

TMr. Bennett, has done some small amount of roofing for me in his peculiar way, with Cotton stuff, coated with a preparation the basis of which appears to be a Coal Tar. It is a very effectual and light roof; and appears to promise considerable durability, from the preservative qualities of the composition, which penetrates the cloth and protects it from the influence of the air and water. The Composition does not liquify and run from the effects of the heat of the sun in summer; nor does it harden and crack from the influence in the cold of winter.

HARDWARE AND CUTLERY.

THE undersigned is prepared to introduce into use in Tennessee W. E. CHILDS & CO.'S PATENT ELASTIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the at ention of Architects, Builders, Railroad Companies, and the public to examine its superiority over other Roofing.

ARCHITECTS AND BUILDERS should not fail to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth sur-face that will resist the action of the atmosphere in every climate. It is impervious to water, elastic, and flexible. It contracts and expands with the changes of the atmos-

It contracts and expands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good sheathing, old shingles, tar and gravel, tin, nine, copper, or iron roofs—it making no difference how steep or flat they may befor seven dollars per one hundred square feet; it being far cheaper than any Roof of the old style, and we are sure it will give better satisfaction.

It will also be found to be the best thing ever invented to nover or mend old leaky tin, tar and gravel roofs, or around It will also be found to be the best thing ever invented to cover or mend old leaky tin, tar and gravelroefs, or around chimneys, scuttles, dormar windows, and guiters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. Tin Roofs can be painted over (and warranted not to leak) at two dollars and fifty cents per hundred square feet, which is cheaper and much better than paint. This Roofing will be found to be the best theng for covering large Roofs where they are exposed to fir—such as Steam Mills, Saw Mills, Factories, Railroad Cars, Bridges, Depots, Station Houses, Steamboat Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint n it, it presents no chance for fire to communicate, and any ight substance will burn out without igniting.

The Insurance Offices at Cincinnatt, and other places where Childs & Co.'s Cement has been used, insure Buildings with Roofs covered with this Cement, at the same rates as for those covered with Iron, Copper or Tin.

The Cement will be furnished to those at a distance with directions for using.

Meeting with great success arong them, I now offer it to the Ameoican public, knowing that its truly wonderful medicinal virtues must be acknowledged. It is particularly recommended to those persons whose constitutions may have been impaired by the continuous use of ardent spirits, or other forms of dissipation.
